

Interactive Bug Panels

\$60.00 plus GST

Where do you find yabbies? Can dragonfly larvae survive in polluted waterways? Are shrimps vegetarian? Learn about 24 of the aquatic invertebrates that live in our freshwater environments using these interactive panels and stick-on bugs. Their 'backsides' tell us what habitat zones they like to live in, what they like to eat and whether they are tolerant or sensitive to pollution. The kit contains 4 laminated A2 panels which join to create a healthy and polluted waterway, plus 24 bugs to stick on to it, and support resources which can be photocopied for use in follow-up activities.

Stormwater/Wastewater Poster

\$3.00 plus GST

An A3 laminated poster showing the different flows of stormwater and wastewater. Students can see clearly that wastewater comes from inside of our homes and is treated before it enters our waterways, while stormwater comes from outside of our buildings and enters our creeks, rivers, wetlands and the sea, untreated.

Stormwater Photo Series

\$20.00 plus GST

Our popular series of 8 A3 laminated stormwater pictures follow the flow of water from rainfall on a roof, down to a stormwater drain in the gutter, as well as showing trash racks in an open channel and a pipe entering a wetland. The images provide many opportunities for group discussion and assist students in understanding new stormwater concepts without leaving the classroom.

A Frog's Life Board Game

\$15 plus GST

Learn all about the many dangers experienced by frogs during their lives in this educational and entertaining life cycle board game.

Snapshots Water Testing Kit

\$335 plus GST

Our water testing kits contain tests for salinity, pH, turbidity, nitrate and phosphate, as well as all safety equipment necessary to start monitoring freshwater environments.

Wetland Processes

\$40.00 plus GST

A set of 15 colourful A3 laminated posters of our wetland processes series, featuring trapping litter, nutrient uptake, soil sedimentation and removing bacteria. Each poster is backed with a simple explanatory blurb suitable for junior primary and primary students.

Habitat Zones Series

\$15.00 plus GST

What on earth is a 'Benthic Zone' and what aquatic invertebrates like to live in one?

Find out about the different sections of a river or wetland and discover the critters that call these places home, using these 5 laminated A3 posters.

Freshwater Habitat ID Cards \$15.00 plus GST

What are some of our different freshwater habitats? What lives there and how do they use them? Find out in this series of 14 informative ID cards that include habitats such as algae, mud, shrubs and trees, pebbles and gravel, snags, river banks, common reeds, riparian rocks and soil, rushes and sedges, bulrushes (cumbungi), lawn, aquatic plants, ash trees and willows, and even concrete! The laminated A5 colour cards include information about some of the creatures that live in these habitats, adaptations that these creatures have developed to live there and the relationship between habitat and water quality.

A Bug's Life Card Games

Bug Trumps - \$40.00 plus GST

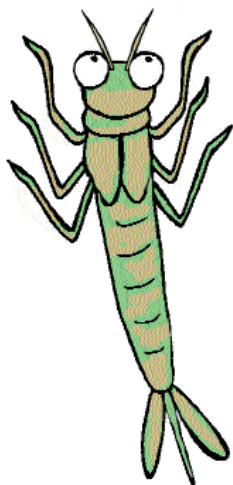

JP Game - \$25.00 plus GST

Life Cycle Game - \$25.00 plus GST

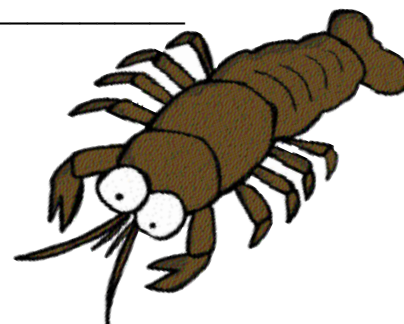

Learn more about aquatic invertebrates in these three fun new card games that cover topics such as identification and classification, life cycles, feeding strategies and pollution sensitivity. Each game comes with complete instructions, a teacher resource pack and other supporting materials. The Bug Trumps game is aimed at middle years students, the JP Game at early to primary years students, while the Life Cycle Game is suitable for all years. These games are ideal as an introduction or follow up to one of our in-class sessions, or can be used as the basis for one of your own lessons.

CONDITIONS

No order can be processed without an official purchase order so that we can invoice you. Please make a cheque payable to KESAB *environmental solutions*. We apologise that we are unable to accept credit cards. Prices current at March 2009 and may change without notice.

*Excludes postage. Delivery within the Patawalonga and Torrens catchments is free of charge and we will make every effort to deliver within 14 days. Delivery outside of this area will incur postage and may take longer than 14 days. We will invoice you after the goods are sent to you to ensure correct postage is charged. To roughly calculate postage, visit www.australiapost.com.au and follow the prompts using the Postage Assessment Calculator for a parcel by regular mail. Orders are usually 45cm (H) x 30cm (L) x 3cm (W). Weights are listed beside each resource above.

** Please arrange a courier to pick up this order if you are outside metropolitan Adelaide. The kit contains hazardous materials and cannot be posted.

Thank you!
